# U3S3M3 - Mocking Dependency Diagram

rackMonitor.monitorRacks()

rack.getHealth()
Uses @Mock'd Rack
returns Map<Server, Double)

calculateTestHealth(server)

arrangeReplacement(rack, server)
Uses @Mock'd WarrantyClient

arrangeInspection(Rack rack, Server server)
Uses @Mock'd Rack, WingnutClient

getUnit(rack, server)

warrantyClient.getWarrantyForServer(server)
Uses @Mock'd WarrantyClient

wingnutClient.requestReplacement(rack, unit, warranty);
Uses @Mock'd WingnutClient
throws WingnutClientException

getUnitForServer()
returns int (server #)
